

SPECIFICITY

The MSCI World index is not a determinant criterion in the fund investment process. It is mentioned in the following only as a risk indicator.

Indeed, the specificity of the investment theme implies significant deviations in both the sector and geographical allocation.

The strategy built is based on economic sectors offering the longest investment horizon for sustainable value creation, which can only partially represent the MSCI World Index.

HISTORICAL PERFORMANCE

PERFORMANCES

	Fund	Index
YTD	-18.57%	-7.66%

Beta	0.97

MONTHLY COMMENTS

During the month of May, the fund posted a performance of -2.47% against a decline of -1.63% for the MSCI World index.

During this period, the fund suffered mainly from the underperformance of companies in the industrial sector. Building materials supplier Kingspan was down 13.7%. The company recently declared quarterly sales up 47% compared to the previous year. The group has maintained its positive outlook supported by a solid order book and adequate activity in most markets, but inflation in commodity prices does not reassure investors. Johnson Controls International also suffered and fell 10.3% after reporting quarterly earnings up 26% and a confirmation of the full-year guidance. supplies slowdowns are weighing on investor sentiment. At the region level, British companies (ex. Ricardo down -3.0% and Johnson Matthey with -6.2%) as well as Swiss companies (Geberit lost 6.3%, SGS down 5.9% and Lem holding lost 21.5% impacted by lockdowns in China, component shortages, amid supply chain crisis as well as war in Ukraine due to rising energy prices) had the biggest impact. On the positive side, we note the good contribution of companies in the Materials sector (ex. Umicore up 13.2% and West Fraser Timber with 2.8%) and Information Technologies (ex. Xinyi Solar Holdings posting a performance of 16.3% and Infineon Technologies is up 5.4%).
